Verdict brief

Every agent's position on one order from the operator, with what was run because of it.

Outcome

1 run(s) started and none finished clean. Nothing usable was produced.

The order

Fetch Illumina reads for ENA run SRR2584863 and call variants against the E. coli REL606 reference. accession=SRR2584863 url=https://ftp.ncbi.nlm.nih.gov/genomes/all/GCF/000/017/985/GCF_000017985.1_ASM1798v1/GCF_000017985.1_ASM1798v1_genomic.fna.gz

Verdicts

4 will do with caveats, 3 will do

ada (planner) - will do with caveats

Fetch Illumina reads for ENA run SRR2584863 and call variants against the E. coli REL606 reference. Ensure Illumina reads are aligned to the reference genome using STAR aligner. Use BWA-MEM for variant calling. Verify the alignment and variant calling steps with QC metrics.

- needs: I
- needs: r
- needs: i
- needs: s
- needs:
- needs: (
- risk: Inadequate QC metrics may lead to false positives or negatives in variant calling.

iris (curator) - will do with caveats

Download the reference genome file GCF_000017985.1_ASM1798v1_genomic.fna.gz from the provided URL, verify its integrity, and proceed with the Illumina reads SRR2584863 for variant calling against the reference. Ensure the reference genome is compatible with the Illumina platform used for SRR2584863.

- needs: V
- needs: e
- needs: r
- needs: a
- needs: '
- needs: s
- risk: The reference genome may not be compatible with the Illumina sequencing data, leading to potential variant calling errors.

quill (scribe) - will do with caveats

Fetch Illumina reads for ENA run SRR2584863 and call variants against the E. coli REL606 reference. Will use the curator's benchtop sequencer and the validator's sample fridge for storage and processing. Will consult the analyst for guidance on variant calling software and the runner for compute resources. Will need to check the freezer's temperamental alarm and the

sample fridge's capacity.

- needs: a
- needs: n
- needs: a
- needs: l
- needs: y
- needs: s
- risk: The freezer's temperamental alarm could cause delays or errors if not properly addressed.

rex (runner) - will do with caveats

(no structured answer came back)

hugo (pi) - will do

Fetch Illumina reads for SRR2584863 and prepare for variant calling. Contact ada for sequencing plan.

- needs: a
- needs: d
- needs: a
- needs:
- needs: f
- needs: o
- risk: unaltered Illumina reads may not align well with the reference, leading to variant calling errors.
- dispatched: ada (plan.request)

nova (analyst) - will do

Fetch Illumina reads for ENA run SRR2584863 and call variants against the E. coli REL606 reference using the provided URL. Ensure the Illumina reads are aligned to the reference genome and variants are called accordingly.

- needs: I
- needs: r
- needs: i
- needs: s
- needs:
- needs: (
- risk: The Illumina reads may not be available or may contain errors, leading to failed alignment or variant calling.

vera (validator) - will do

Fetch Illumina reads for ENA run SRR2584863 and call variants against the E. coli REL606 reference using the provided accession and URL. Ensure Illumina adapter trimming and quality filtering are applied. Verify the reference genome integrity and completeness. Monitor the computational resources and storage space to avoid any run failures due to resource constraints.

- needs: N
- needs: o
- needs: v
- needs: a
- needs: '
- needs: s
- risk: Insufficient storage space for the large Illumina reads and variant calling outputs.

Spoke, but returned no verdict

system

Verdict brief ready: 7 verdict(s) on "Fetch Illumina reads for ENA run SRR2584863 and call variants against "

What ran

Variant Calling Workflow - failed

run	run-4b825237d356
steps	step1:skipped, step2:failed
seconds	0.0

`~/lab/runs/run-4b825237d356`

What it cost

20,364 tokens across 13 model calls, $0.0000 priced.

ada	2 calls, 3,362 in / 516 out
hugo	3 calls, 4,812 in / 156 out
iris	4 calls, 5,463 in / 275 out
nova	1 calls, 1,320 in / 125 out
quill	1 calls, 1,313 in / 154 out
rex	1 calls, 1,327 in / 94 out
vera	1 calls, 1,309 in / 138 out
